Election/Restrictions

Applicant's election without traverse of claims 17-22 in the reply filed on 11/21/2005 is acknowledged.

Non-elected claims 1-16 have been cancelled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 12-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over. Weaver (6641776) in view of either of Tomonto (6264687) or Schwartz et al (5443496).

Weaver discloses a method for making a modulated stent comprising the steps of:

coumpounding a mixture of at least one metal alloy and at least one polymer binder;

molding the mixture to form a composite structure having a strut member and a supporting member;

removing the binder from the composite structure;

Application/Control Number: 10/656,730

Art Unit: 3738

sintering the composite structure.

Weaver describes the method referring principally to the embodiment disclosed in Patent No. 5972027, however, states that the invention is not limited to the preferred embodiments but may cover various modification and equivalent arrangements. Each of Schwartz et al and Tomonto teaches fabrication stent from individual segments which are then interconnected to form a unitary device. Advantages for these types of stents are known in the art including better flexibility and conformity for complex body passageways. To make a plurality of adjacent stent segments by the process of Weaver and connecting the adjacent segements together on a mandrel by a flexible fastening means to yield a unitary stent that has flexibility and conformity properties that better compliment complex body passageways would have been obvious to one with ordinary skill in the art from the teachings of either of Tomonto or Schwartz et al.

Claims 18,19,21 and 22, see column 5, lines 1+.

Claim 20, see column 1, lines 35+ and column 4.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID J. ISABELLA whose telephone number is 571-272-4749. The examiner can normally be reached on MONDAY-FRIDAY.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, CORRINE MCDERMOTT can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
